- TailwindCSS

about me

Passionate developer with 2 years of experience, combining programming skills and UX/UI design to create clean, user-focused interfaces.

my experience

Rogers Capital

software developer | Sept 2025 - Present

As a Software Engineer, I focus on building clean, user-centered code tailored to each client's needs. I also collaborate on UX design, translating requirements into intuitive experiences before development begins.

DGamerStudio LLC

frontend developer | Dec 2024 - Jul 2025

I worked on the product's internal CMS, creating UX/UI prototypes and new features with the backend team. I also played a key role redesigning in-game user interfaces to improve visuals and player experience.

my background

Holberton School Uruguay

foundations in computer science | Nov 2023

Here, I built a solid foundation in teamwork, adaptability, and communication through hands-on, simulated projects in a high demanded work environment.

my latest projects

mcobro

Website for Uruguayan medical staff designed as a financial tool, featuring a built-in scheduler and automated invoice generation.

linkly

A web app to shorten, share, and manage custom links. Includes a dashboard with settings and tracking.
